EXPERIENCE

UX/UI Designer & Web Developer   2025.05 - 2025.12

World Food Programme of the United Nations, Remote

- Collaborated with product managers, developers and designers to create 3 fully responsive and interactive websites that showcase important data in a storytelling way.
- Ensured cross-browser compatibility when coding frontend interfaces using modern frameworks and tools like React, CSS3, TypeScript, Vite.
- Created wireframes, storyboards and prototypes using Figma to effectively communicate design ideas to stakeholders.
- Optimized website content for search engine visibility by utilizing SEO best practices and techniques.
- Conducted 5+ usability testing for the websites to identify areas of improvement for UI design elements and sections.

Data & Operations Manager   2023.08 - 2025.12

The Table, Harding University, USA

- Designed and developed a robust React web application that displays products in stock and out of stock to Harding Students, leveraging MySQL databases for real-time inventory control and the registration of **1167 shoppers** since it began operations.
- Improved the management system by enhancing the user interface for volunteers and workers. This included a sidebar panel with features such as statistics, sign-out functionality, and a profile section where users can view the total hours they've worked.
- Deployed the system on a Linux server using modern frameworks such as Docker, MySQL, Express, APIs.

UX/UI & Web Developer Freelancer   2024.05 - 2025.05

Spring Hills Ranch, MO, USA

- Designed and developed a fully functional e-commerce website using Figma, PHP, MySQL, and SCSS.
- **Ranked #1 on Google Search.**
- The website is live and accessible at: **springhillsranch.com**
